

Week 5: Array of Structure

Video-05:ตัวอย่างการใช้งาน ตัวแปรโครงสร้างซ้อนกับตัวแปรโครงสร้าง

typedef struct{

ตัวอย่างการใช้งาน

```
int dd, mm, yy;
}date;
typedef struct{
     int h,m,s;
}time;
```

```
struct email{
    char subject[20];
    char text[1000];
    date sent_date;
    time sent_time;
};
```

How to set

```
subject ="I love cats"
text="Cats are lovely, I love them."
sent date =20/07/2023
sent time= 20:01:02
```

```
typedef struct{
     int dd, mm, yy;
}date;
typedef struct{
     int h,m,s;
}time;
```

```
struct email{
      char subject[20];
       char text[1000];
       date sent date;
      time sent time;
};
Setting
subject ="I love cats"
struct email e;
strcpy(e.subject,"I love cat");
```

typedef struct{

```
int dd, mm, yy;
}date;
typedef struct{
     int h,m,s;
}time;
```

```
struct email{
           char subject[20];
           char text[1000];
           date sent date;
           time sent time;
    };
    Setting
    struct email e;
    text = "Cats are lovely, I love them"
strcpy(e.text, "Cats are lovely, I love them");
```

```
typedef struct{
     int dd, mm, yy;
}date;
typedef struct{
     int h,m,s;
}time;
```

```
struct email{
       char subject[20];
       char text[1000];
       date sent date;
       time sent time;
};
Setting
struct email e;
sent date =20/07/2023
e.sent date.dd=20;
e.sent date.mm=7;
e.sent date.yy=2023;
```

```
typedef struct{
      int dd, mm, yy;
 }date;
typedef struct{
     int h,m,s;
}time;
```

```
struct email{
       char subject[20];
       char text[1000];
       date sent date;
       time sent time;
};
Setting
struct email e;
sent time =20:01:02
e.sent time.h=20;
e.sent time.m=1;
e.sent time.s=2;
```
